

BIOGRAPHY

Chip Golde,
Vice President
ARES Corporation

Chip Golde has 35 years of experience in the management and control of major capital projects for both government agencies and private industry. In his career he has worked as a field engineer, cost estimator, scheduler, cost engineer, project controls manager and corporate director of project controls for major EPC firms. Projects include cement plants, gold, copper and aluminum processing facilities, power plants, and transportation systems. He has also worked on numerous projects at DOE facilities including Hanford, Los Alamos National Laboratory, Lawrence Livermore National Laboratory and the Savannah River Site where he has been responsible for the implementation of earned value management systems. For the past 20 years, he has been directly and indirectly involved in the design and implementation of computer software products for capital cost estimating, project cost control including earned value management, engineering management, document control, procurement and risk management. Mr. Golde holds a degree in Construction Engineering Management and is currently serving as Vice President of Global Sales for ARES Corporation's Software Products Group where he is responsible for the sale of ARES PRISM Suite of Project Management software products and services.
